Job Description

The IT Technical Associate Data Analyst has responsibility for designing and developing information technology solutions to accomplish database management tasks, working primarily within the NIU Foundation's relational database management system (RDBMS). This position provides continual comprehensive confidential data and reports for internal and external stakeholders of the NIU Foundation. This position must maintain an in-depth working knowledge of the system and the data. Development duties often consists of expertise in every component of a major relational database management system. Collaborate with other data analysts, team members and stakeholders in matters of data management as and when desired.
